

REACT FINLAND APP LESSONS LEARNED

<https://github.com/ReactFinland/react-finland-app>

THE TEAM

- Aarni Koskela
- Aleksi Pousar
- Joni Nevalainen
- Toni Ristola
- Maybe You next year?

THINGS THAT WILL TAKE TIME:

- Finnish Patent and Registration Office
- Registering account to the App Store
- Drawing the rest of the fucking owl

CHANGES WE DID

- All the colors and styles changed before release
- Used Apollo Client to fetch data
- Instead of two nested navigations we used navbar

POSSIBLE FEATURES NEXT YEAR

- Giving applause to talks
- Giving feedback to talks, and the conference
- Showing the current talk in the app?

OTHER THINGS TO CONSIDER WHEN CREATING THE APP

- Have a Designer in the team
- Reserve enough time - doing a good app and testing it takes time, no matter the framework
- Test with enough devices - publish alpha early

**DO NOT, I REPEAT, DO NOT MAKE A
NATIVE APP."
-KITZE**

Code is in github, you can play
with it or even make pull
requests

- Toni Ristola @ Gofore Oy
